WHY CHOOSE Acrenzal® WDG

Acrenzal® WDG is an advanced neonicotinoid insecticide formulated with Clothianidin 50% WG to disrupt normal nerve signal transmission in insect-pests, leading to paralysis and eventually death. Its non-repellent action allows pests to unknowingly transfer the insecticide among the population within harborages, leading to broader spread and more impactful pest management.

HOW IT WORKS - MODE OF ACTION

Binds to Nicotinic Acetylcholine Receptors (nAChRs) in insect neurons

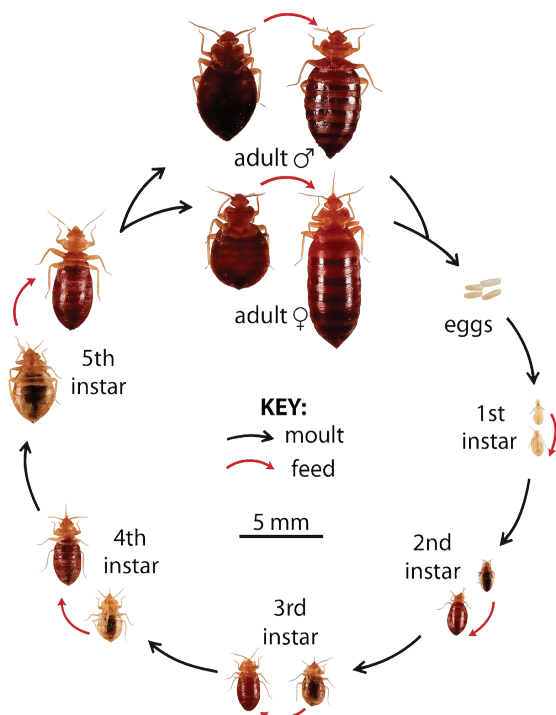

Interrupts nerve signal transmission

Leads to paralysis and eventual death

POWERED BY CLOTHIANIDIN 50% WG, A NEONICOTINOID THAT ACTS THROUGH BOTH CONTACT AND INGESTION.

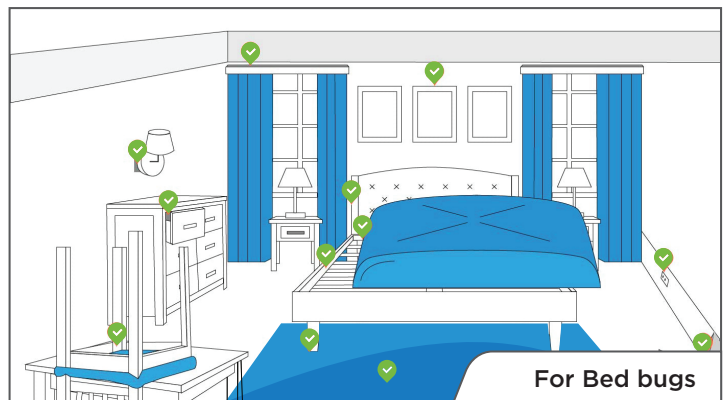

DOSAGE AND APPLICATION

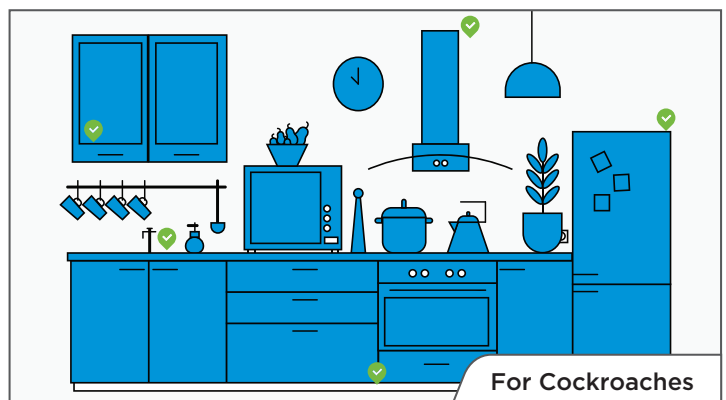

6g unit dose to mix with 3.75 L water
& covers 50 sq. meters area

*Read product leaflet before application.
